Society of Obstetricians and Gynaecologists of Canada
to present

ALARM
SEPTEMBER 22 & 23, 2018
7:30 am – 5:00 pm daily

ALARM was developed by family physicians, obstetricians, midwives, and nurses, who jointly continue to maintain and teach the course. ALARM is based on the best available Canadian evidence, making it relevant for an all-Canadian audience. ALARM is aligned with the Managing Obstetrical Risk More Efficiently Program (MOREOB), a course developed and taught interprofessionally, and commonly required for Canadian intrapartum-care providers working within a hospital setting. Presenter: Society of Obstetricians and Gynaecologists of Canada (SOGC)

The two-day course offers case-based plenary sessions, hands-on workshops, and a comprehensive examination process. The course content is evidence-based and incorporates Canadian practice guidelines. Participants completing the course gain an understanding of the latest best practices for providing care and will know how to improve the outcomes and process of intra-partum and immediate postpartum care.

This Assessment program has been certified by the College of Family Physicians of Canada for up to 42 Mainpro+ credits

**Session will be held at
HILTON WINNIPEG AIRPORT SUITES**

1800 Wellington Avenue, Winnipeg PH: (204) 783-1700
